REDESIGNING INTERACTIONS...

BY PAUL

HOST

Interaction-Identifier is the host. “But it doesn’t host things immediately”

DISPATCHER’S ROLE

The Dispatcher “puts the Interaction together into its final form” by combining the Interaction-Identifier with a Permission from Storage

FULL INTERACTION

The Full Interaction has the .execute() method

FULL-INTERACTION.EXECUTE()

Part of what the .execute() does is check’s the permission, then decides whether or not it can call .caseAt(~)

GAME ITEM

The game item has a Dictionary<Full-Interaction, tuple>

TODO

Add S-V-O Definition to the Glossary
